SUMMARY

My name is Sajjad Abdollahi from Iran , a developer with an experience of building applications in agile environments, such as Scrum. My experience involves building scalable server side web apps using frameworks like Laravel .

- More Than 10 Years of Experience in Software & Web Developement

- Architected and developed back-end and front-end for Online Shops.

- Acted as lead developer managing a team to write enterprise grade PHP Laravel code.

- Designed architecture of more than 12 high end applications.

EXPERIENCE

- **Faico**   Mazandaran, Iran
  Laravel Developer   *May 2019 - Present*

  Laravel and Livewire are great pair for designing the architecture of the website that fully qualified for ajax behaviour and REST APIs

  - developing well-organized, maintainable, object-oriented, unit-tested code
  - developing highly scalable and composable RESTful APIs
  - **MVC Architecture**: use models and controllers to handle the logics of the whole system
  - Maintenance of existing infrastructure

  Technologies
  - **Artisan**: use php artisan utility command to migrate database tables
  - **Sanctum**: Authentication and authorization standards such as Sanctum, OAuth
  - **Tailwindcss**: create beautiful user interface
  - **Composer**: using composer to install third party packages
  - **Notifications**: Service for sending email, push and in-app notifications. Involved in features such as delivery time optimization, tracking, queuing and testing.
  - **Eloquent**: make models to have more readable and maintainable code and boost the performance and scale the application easier .

  Achievements
  - **In App Billing**: Implementing money payments for the application
  - **Authentication**: send sms to verfiy that the registration request is for right person
  - Clean Code written

- **Maghzafzar**   Mazandaran, Iran
  PHP Developer   *Apr 2016 - Feb 2019*

  a System for organizing your interactions with your loved ones. a CRM for your friends , family and customers

  - Add and manage contacts and Define relationships between them
  - Upload documents and photos and add notes for a contact

Technologies

- **Blade** for template engine
- **Validating request** sanitize and trim data to secure the server-side and database transactions and improve the security of the requests by 80%
- Developed RESTful API for mobile applications and web applications using Laravel
- use **job** and **queue** and schedule them to serve the light and fast server response
- **Dev Environment**: Developement environment based on docker , standardized and require the PHP and Laravel dependencies. manage the core libraries that are shared by others.
- **Laravel Testing**: write unit and functional tests, we make sure that page response status codes are correct and each component is visible in their belong pages .
- **Database Seeding**: with factories and seeding database it is easier to layout your website with ready to serve json data from server to your front-end and icrease the speed of coding by 30%
- **Livewire**: add items to your cart without reloading the web page , sync every action you do on the front side with back-end of the same component on the server , it makes every user interaction more joyful to the customer and also reduce amount of javascript code written by 80%
- Writing custom PHP packages

Achievements

- **GIT** as my version control system
- **Laravel voyager** to make custom admin panel for management
- Managed 500+ customer accounts with the least complaints in 2 years and with 90% customer rating in online surveys.

PROJECTS

- **Nekabeauty**   Sari, Iran
  Web Developer   *Feb 2014 - Jan 2016*
  Chatbox is an online Messaging App Written in Node.Js with Express Framework works perfectly sending and

  recieving messages across the internet

TECHNICAL SKILLS

- PHP , Laravel , Livewire

- Databases , MySQL , Sqlite , Tinker

- HTML , CSS , Tailwind

- Javscript , Alpine

- Git , Docker , Devops

EDUCATION

- **University Of Mazandaran**   Babolsar, Mazandaran, Iran
  Bachelor of Software Engineering   *2010 – 2013*
- **Azad University of Neka**   Neka, Mazandaran, Iran
  Bachelor of Software Engineering   *2017 – 2020*

  - the main project was about watchman route problem that is about the smallest routing path a watchman should go to see all the space on the room , the accuracy of my program was about 98% in different scenarios – the code is available on my github : https://github.com/sajjadabd
